Data Release Authorization  
1st June 2017

**RE:** BADAN NASIONAL PENANGGULANGAN BENCANA / HUMANITARIAN OPENSTREETMAP TEAM OSM  
MAPPING LIFELINE INFRASTRUCTURE PROJECT

**SUB:** RELEASE OF SURVEY INFORMATION

The Humanitarian OpenStreetMap Team would like to share its sub-village boundary information, collected through field survey in several major cities in Indonesia, with the local and global community as part of the Pacific Disaster Center (PDC) InAWARE programme to improve risk assessment, early-warning, and disaster-management decision making across Indonesia.

Enhanced capacity within national, provincial and municipal disaster management agencies to access automated international, regional, national, and local hazard information and supporting infrastructure data is at the core of the InAWARE programme.

The data, which we release now, contributes towards these efforts and should always be available under a free and open license. We hereby release this dataset for use in OpenStreetMap under the ODbL license. We welcome the opportunities made available from the release of this data and look forward to seeing the future results.

This release also applies to any future versions of this dataset being acquired through field survey.

Best regards,

A handwritten signature in black ink, appearing to be 'Yantisa' followed by a stylized surname.

Yantisa Akhadi  
Project Manager for Indonesia  
Humanitarian OpenStreetMap Team
